Horace McCarty vs. Laura S. McCarty, divorce.

Arthur Hackett, one of the employees at the Corunna coal mines, slipped from a plank into a tank of boiling water scalding his limbs badly. He was promptly cared for and will not be crippled.

#### Good Roads Again.

The article in last week's issue of THE TIMES on the subject of good roads commands itself to every thinking mind. The facts are that as it is now our road tax is "soldiered" out and not worked out. It is a common feeling among farmers that all time spent on the road is so much lost labor, and as a consequence the average work done does not exceed one-quarter the amount that could be done with a money tax.

A plow, that may or may not be used half an hour, and a drag and a wagon and a man and a team count a day each, making six days' credit for what should be one day with man and team, \$2.50. Again, according to the plan usually pursued by the average road-worker, one good man and team, working to see how much they can do in a given time, will accomplish more in half a day than the one who is trying to kill time would in a day and a half, and do it better.

The customary way is for the pathmaster to warn out all workers some time in the spring when it suits his convenience, and as the time when road work ought to be done—all dirt ought to be moved before the first of July—happens about even-boiling time, if the ones warned out or any portion of them are busy in their corn, they don't respond but are allowed to go on alone, perhaps, and make believe work out their tax, and so the work is monkeyed with and the roll finally returned as worked, when in fact half of it has been credited out instead of worked out.

There is small doubt that a money tax of one quarter of the amount now assessed would do more work over the country and put it where it is needed, and be more satisfactory to the farmers themselves, to say nothing of the traveling public. As your correspondent very truthfully observes, if the roadworkers and the districts are very unequally apportioned, so as a rule where the most work is needed the least tax is assessed and unless the highway commissioner has his attention called to some special piece of work he pays no more attention to the roads than he does to the moons of Jupiter. There are old grey headed mudholes around in this vicinity that have stood right in the middle of the road and have been traveled around and through for forty years or more and have caused profanity enough to sink them to the center of the earth, when half an hour's work with man and team would have eradicated them for all time.

This of course is the fault of pathmasters, who follow in the footsteps of their illustrious predecessors, no matter what they do, and who, as a rule are elected and re-elected for the reason that they are easy on the road-workers or for general pig-headedness. It is an absolute fact that the average pathmaster knows nothing about road-making and generally makes out to leave the highway worse off than he found it, with an especial effort—and this everyone knows—to avoid leveling off the surface where dirt has been dumped and leave it to be smoothed off by cart wheels and profanity. This they never fail on, when a drag and team or man and hoe would level it in fifteen minutes. Never leave a day's work on the road until you smooth it down, for the work you intend to do tomorrow never is done.

This matter of good roads is everybody's business, and consequently never done, but the law provides a way of escape from the present horrible condition of affairs and it is to be hoped that people will continue to agitate this question persistently and perpetually or until we have a change, which, no matter what it is, must be for the better.

#### SCIOITA.

P. S.—These pathmasters who make false returns on their rolls ought to be prosecuted.

### MAKES RED BLOOD.

New Life for the Worn out Nervous Tissues.

The Body Gains Rapidly in Weight and Strength.

From the Greatest of all Nerve and Brain Restorers.

PAINE'S CELERY COMPOUND MAKES PEOPLE WELL.

Watch the Crowded Streets of Any Large City.

By far the finest portrait galleries in the world are the crowded streets of a large city.

"What a serious, tired expression on most every face!" one can't help saying to himself. It is rare that one goes by that does not wear something of that strained, worn look; and how many more pale lips there are than rosy ones. How often the eyes are dull, the flesh flabby, and the tell-tale line from the corner of the lip to the angle of the nose, drawn painfully deep.

Poor health is unmistakable to the most casual observer. When the body is but poorly filled out with flesh, and a feeling of languor pervades the system, plainly there is something lacking in the vital, nutritive powers. Impure blood is keeping the tissues poorly fed and starved and vitalized.

Get the blood pure with Paine's Celery Compound and languor and debility will leave the body. Restore the nervous energy to the brain and nerve cells and good spirits and vigor will take the place of despondency and moodiness. Backaches, persistent headaches, that general feeling of fatigue, neuralgia, rheumatism, and heart weakness that shows itself in frequent palpitation—are all but various symptoms of a nervous organization badly nourished. Paine's Celery Compound promotes the healthy activity of the organs that make the blood and keep it pure. The weak parts of the body are thus enabled to build themselves up when this magnificent nerve

and tissue builder is employed. The complete recovery and repair of the diseased organs in this way goes on rapidly, naturally, and the happy results are permanent. The effect of the intelligent use of Paine's Celery Compound in all wasting and debilitating diseases is to check at once the decline in strength, and to keep the tissues from further degeneration.

Glen V. Mills, publisher of our city directory, has been appointed city clerk of Ann Arbor.

John M. Baird, for many years secretary of the Oakland, Geesee and Shiawassee fire insurance company, died at his home in Holly on Thursday of last week. He was one of the best known men in this section of the state, and his death is sincerely regretted.

Weather report for January 1895, reported by Geo. W. Collier: Average warmest, 34.4 deg.; average coldest, 13.7 deg.; warmest days 6th and 20th, 26 deg.; coldest day 28th, 3 deg. below zero; rain, 3 days; snow, 13 days; clear 8 days; southerly winds 27 days; northerly wind 3 days; average warmest for Jan. 1894, 34.3 deg.; average coldest for Jan., 1894, 21.3 deg.; coldest day 25th, 3 deg. below zero; warmest day, 20th, 40 deg.

A cigarette is slow poison, dead sure, and sure death, while a cigar is said to contain acetic, lonic, butyric, valeric and paucoponic acids, prussic acid, creosote, carbonic acid, ammonia, sulphuretted hydrogen, poridine, viridine, pinoline, and rubidine, to say nothing of carbazine and burdockine acid. No wonder a cigar will make a small boy sick. He never received so much for his money before in his life.

CONAN DOYLE'S impressions of the literary phases of American life are to be contained in an article to appear in the next issue of THE LADIES HOME JOURNAL. The article was originally intended to be the novelist's impressions of American Women, but this plan was altered and the article to be printed in the JOURNAL will give Dr. Doyle's ideas of "Literary Aspects of America."

Mr. E. V. Smalley contributes to the February Review of Reviews an interesting study of civil government in Manitoba, under the title, "Canada's Prairie Province." His account of the institutions of this little-known government on our northern border is extremely enlightening and suggestive. The article is well illustrated.

List of letters remaining uncalled for at Owosso postoffice for the week ending Feb. 2, 1895: W. E. Bartly, Wm. J. Becker, Harry Dutton, E. Glancey, Clara A. Guilford, H. Marraill, James Kennedy, Lulu M. Guilford, Mrs. Diana Dingman, Mrs. Lina Lewis, Daisy Moffitt, Mrs. Myron Morton, Katie Tennit, B. B. Prindle, Mrs. Mary Connor. Drop: Anna White, C. E. Harbeck. Foreign: Henry Bruce.
